Enrichment Program

Commitment to Learning and Development

Our philosophy is to create a friendly and supportive atmosphere where children feel encouraged to develop new skills, enhance old talents, and establish positive lasting relationships with peers and staff. Our programming and supportive environment encourage children to participate in activities and experiences planned to benefit them academically, emotionally, physically, and socially.

Special emphasis is placed on establishing a child's self-esteem and confidence. We do this by designing our programs to cover a wide range of age-appropriate activities that foster our core character values: caring, honesty, respect, and responsibility.

Safety First

We are all in this together! As the safety of our students, families and staff are our primary goal, we have implemented safety procedures that include but are not limited to the use of facemasks, multiple temperature checks, health questionnaires, sanitation stations, class conducted in a stable group, constant handwashing, lunch in the classroom, no contact sign-in and sign-out, and online payments to prevent paper transactions.

Please review our comprehensive [Sunshine Safety Operating Procedure \(SOP\)](#) based on the guidance from CDC, DSS Licensing, and County of Santa Clara Department of Public Health. Together by following the expert guidance, we can return to our lives safely.

Effective Learning

Our dedicated and caring staffs will enhance your child's learning with the all important "human interaction". We provide a small and stable group of staff and student, so your child can grow academically, cognitively, mentally and emotionally. Students with special interests can enhance their experience by enrolling in our extracurricular activities such as:

- Basketball
- Chess
- Clay Art
- Chinese Enrichment (Free)
- Kung Fu
- Mixed Media Art
- Soccer
- Western Art
- Yoga

(classes may vary each semester & by location)

Peer Interaction

One of the most important ways students learn is through peer-to-peer interaction. Being in the same classroom, students can learn from everyone's experiences. This allows them to garner important insight, ideas and much needed social interactions.
